

Serial No. 10/005,757

Amendments to the Claims.

A following listing of claims replaces all prior versions and listings of claims in this case.

Claims 1-11 (canceled).

Claim 12 (previously presented): An extended text label for a capped tube container in combination, wherein a capped tube container includes a product dispensing end having a dispensing cap and a filling end opposite said product dispensing end, the combination comprising:

- a capped tube container, including a crimp method seal at said filling end thereof that is crimped subsequent to filling said capped tube container with a selected product;
- an extended text label that is securely joined to said filling end of said capped tube container by way of said crimp method seal; and
- a pliable attachment tongue extending outwardly from said extended text label such that said tongue is securely joined to said filling end of said capped tube container at said crimp method seal.

Serial No. 10/005,757

Claim 13 (previously presented): An extended text label for a capped tube container in combination, wherein a capped tube container includes a product dispensing end having a dispensing cap and a filling end opposite said product dispensing end, the combination comprising:

a capped tube container, including a crimp method seal at said filling end thereof that is crimped subsequent to filling said capped tube container with a selected product;

an extended text label that is securely joined to said filling end of said capped tube container by way of said crimp method seal; and

a tear off portion for permanently removing said extended text label from said tube container after said extended text label has been securely joined to said filling end of said capped tube container at said crimp method seal.

Serial No. 10/005,757

Claim 14 (previously presented): An extended text label for a capped tube container in combination, wherein a capped tube container includes a product dispensing end having a dispensing cap and a filling end opposite said product dispensing end, the combination comprising:

a capped tube container, including a crimp method seal at said filling end thereof that is crimped subsequent to filling said capped tube container with a selected product;

an extended text label that is securely joined to said filling end of said capped tube container by way of said crimp method seal;

a pliable attachment tongue extending outwardly from said extended text label such that said tongue is securely joined to said filling end of said capped tube container at said crimp method seal; and

a tear off portion for permanently removing said extended text label from said tube container after said extended text label has been securely joined to said filling end of said capped tube container at said crimp method seal.
